This material may not be distributed without permission of the author.

The purpose of this document is to show you what you can expect should you choose to invest in this issue of the 0-hr Armada Codex. This issue presents the Praetorian-class patrol boat.

The product consists of a main book, map pages book, and uncut map images. Starfinder stat sheets and ship images are also included. Specifically, this is what is shown in this brief demo document:

- **Page 2 (top): Main Book.** An overview of the ships, components, and statistics is provided. The stats are generic descriptions and not from any particular game system. Each area of each vessel is enumerated and described. Rendered images are included throughout.
- **Page 2 (middle): Map Book.** The map book provides tactical maps (1 inch = 5 ft.) for the interior areas of the ships. The pages are designed to be printed out and laid edge to edge. Layers are used so that certain map elements (like the grid, cargo, or the black and white version of the map) may be toggled on and off as desired.
- **Page 2 (bottom): Uncut Maps.** Complete deckplans are presented in a single giant image, layered so that the grid, black and white version, and so on can be toggled on or off. It includes a light background good for printing, and a dark background good for display on a computer or with a projector. Single layer jpeg images are also included for easy VTT use.
- **Page 3:** This is a sample page from the map book. The layers are live in this demo document.
- **Page 4:** On this page is some of the art from the main book.
- **Page 5:** This is a copy of the product overview from the sales web page.

Thank you for taking the time to explore this product line. I hope that these ships can find a place in your fleet!

0-hr Armada Codex

Quixote & Coyote

This project presents two similar, but very distinct, ships: one is a noble hero and the other a vile pirate. Either ship can serve as friend, foe, or home to a band of mercenaries and adventurers.

Quixote is a roving justicar - a knight errant given the task of patrolling deep space to keep the trade lanes safe from reavers and pirates. Traveling alone but with the full authority of the Theocracy, these ships are beacons of hope in the darkness. She carries 5 officers and two dozen additional crew, plus a couple of Sarkana-class fighters, an air car, and a single multi-purpose drop pod.

The Coyote is (mostly) a Quixote-class ship. It lost a fight with a band of outlaws and now serves those it previously hunted. This is a grungy, cobbled-together pirate ship that incorporates salvaged and jury-rigged systems. It's unique and dangerous with a reputation as a ruthless hunter. They say she once shot off her own wing to escape an interdiction mine. This one carries a crew of around 30 plus a trio of boarding pods, a wing of fighter drones (aka "Fleas"), a small Lokai-class shuttle, and an old flatbed truck.

The Quixote/Coyote package contains three highly detailed, layered PDF files:

- Main Book
 - 31 page PDF file detailing the interior areas of the ships and their capabilities.
 - Contains 3D rendered scenes as well as orthographic views.
 - Background, art, and text are on different layers for custom display and printing.
- Map Pages
 - 30 page PDF file containing complete interior maps at 1 inch = 5 foot scale.
 - Divided into pages for easy printing in full color or printer-friendly black and white.
 - Selectable layers include: 1-inch grid, black & white version, and optional cargo/vehicles.
- Uncut Map Images
 - 2 layered, single-page PDF files containing 24x36 inch images of the deckplans.
 - 2 text-free 150 dpi jpeg images, grid-aligned, on a dark background is provided for VTT use.
- Starfinder Statistics
 - Custom Starfinder stat sheets are provided for Quixote and the Coyote:
 - Quixote: a tier 12 justicar (medium corvette frame)
 - The Coyote: a tier 10 pirate (medium transport frame)

Sample documents and art, as well as poster maps, ships miniatures, and a whole fleet of additional Starfinder sheets (including form-fillable and black-and-white versions), are available at **0-hr.com**.

Thank you for looking over these ships. I hope that they can help bring your campaign to life!
